

# Question: 11.11.1.15

Nikam Pratik Balasaheb (EE21BTECH11037)

## 1 PROBLEM

Does the point  $\begin{pmatrix} -2.5 \\ 3.5 \end{pmatrix}$  lie inside, outside or on the circle  $x^2 + y^2 = 25$  ?

## 2 SOLUTION

Given circle equation is,

$$\|\mathbf{x}\|^2 = 25 \quad (2.0.1)$$

The point  $\mathbf{x}$  lies inside a circle with centre  $\mathbf{O}$  and radius  $r$  if  $\|\mathbf{x} - \mathbf{O}\|^2 < r^2$ .

The point lies inside the circle if  $\|\mathbf{x} - \mathbf{O}\|^2 > r^2$ .

And, the point lies on the circle if  $\|\mathbf{x} - \mathbf{O}\|^2 = r^2$ .

Here,

$$\|\mathbf{x} - \mathbf{O}\|^2 = \left\| \begin{pmatrix} -2.5 \\ 3.5 \end{pmatrix} \right\|^2 = 18.5 \quad (2.0.2)$$

$$r^2 = 25 \quad (2.0.3)$$

$$\Rightarrow \|\mathbf{x} - \mathbf{O}\|^2 < r^2 \quad (2.0.4)$$

Therefore, the point lies inside the given circle.
